Give one copy of the completed form reflecting group consensus to the Master Teacher.

Toolkit Input Form Individual Worksheet

Directions:

1. Each group will be given a Grade Level/Domain or Course/Unit to use for this activity.
2. Members of each group will be given framework documents which match their Grade Level/Domain or Course/Unit assignment.
3. Group members should first individually review the standards in their Grade Level/Domain or Course/Unit assignment using the framework.
4. Each individual should select 5 standards from their assigned section that they believe will be challenging to teach.
5. To help inform future work by MSDE, rank your 5 standards in order from the most challenging to teach to the least.
6. Group members should then compare lists and come to a group consensus for recording on the Group – Toolkit Input form.
7. Once a group has come to consensus on the Top 5 Standards, they should make recommendations as to which Toolkit items should be developed to support the teaching of each standard.
